# Get Free 10 100 Base T Ethernet

A 100BASE-TX transmitter sends three differential voltages, +1 V, 0 V, or -1 V. Unlike earlier Ethernet standards using broadband and coaxial cable, such as 10BASE5 (thicknet) and 10BASE2 (thinnet), 10BASE-T does not specify the exact

# Get Free 10 100 Base T Ethernet

type of wiring to be used, but instead specifies certain characteristics that a cable must meet. This was done in anticipation of using 10BASE-T in existing twisted-pair wiring systems that did not conform to any specified wiring standard.
