~~In most species of chameleon, males tend to be larger. This difference can be inconspicuous or striking, with the male growing to twice the size of the female. Size, however, varies hugely depending on species and care. Some species do have larger females, and others have no size difference at all.~~

~~In this series, Chameleon Boy is characterized as a generally humorous and wise-cracking character, similar to Beast Boy in the Teen Titans series, although he can be serious if necessary, and is prepared to defy Legion rules if he thinks they are unjust. Also like Beast Boy, he appears to be younger than his comic book counterpart and mostly turns into animals.~~

Introduction to Chameleon. The Chameleon is a very popular type of Lizard due to the fact that it has the ability to change colors based on their mood. This also allows them to blend into the surroundings for safety. Other factors influence color too including mating season and even the temperature around them.

Behavior and Temperament Young chameleons are usually a dull gray/brown color and can change shades a bit. At around five months of age, the adult color and the ability to change colors develop, and a range of colors including green, blue-green, turquoise, and black can be seen.

~~A Guide to Caring for Pet Chameleons—The Spruce Pets~~

To breed a chameleon is not easy, making chameleon breeders experts in keeping chameleons healthy. Only a healthy chameleon will produce offspring that can be raised to 3 months old in order to sell them. I do not recommend buying veiled chameleons younger than 3 months. Here I explain why. The advice of breeders is therefore worth gold.
