How to Fix Overheating on a Northstar | It Still Runs

So your Northstar powered car overheated, or it's blowing white smoke. It may be losing coolant and you can't explain where it's going. There are three ways the head gaskets can fail on a Northstar. 1- exhaust gases blow into the cooling system under load, such as when you climb a hill or pass someone. 2-coolant gets into the cylinders and you leave a trail of white smoke behind you. 3-coolant gets in your oil or vice-versa.
