What shape is the shadow on the face, in simple terms. There are four common portrait lighting patterns, they are: Split lighting, Loop lighting, Rembrandt lighting, Butterfly lighting. There are also Broad and Short lighting which are more of a style, and can be used with most of the patterns above.

"A portrait is a likeness." Digital Portrait Photography and Lighting by Catherine Jamieson and Sean McCormick (published by Wiley) starts with this simple definition and premise and goes on to declare that "the photographic portrait may well be one of the more important social tools we have." It's no secret that I love making portraits—it's probably my favorite type of photograph.

Watch video: Key lighting and fill lighting for perfect portraiture. Key and fill is one of the most fundamental concepts in lighting. It's a reliable technique not just for portraits, but for lots of different subjects. In essence a key and fill are two light sources – one slightly stronger than the other. The key light is the main light used to illuminate our subject, while the fill light provides a lift to the shadows.

Portrait lighting usually looks best when the light source is in front of the person, but off to the side. It also helps if the light source is a little higher up. Notice that the window is beside the infant and that she is placed back a bit. This is the resulting portrait. 50mm ISO 1600 f/4.0 1/500 sec.
