project performance with an integrated schedule and budget, which is based on the project work breakdown structure (WBS). Earned Value Management System (EVMS): This is the collection of tools, templates, processes and procedures that an organization uses to do EVM.

~~Using Earned Value Management to Measure Project Performance~~
Earned Value Management (EVM) helps project managers to measure project performance. It is a systematic project management process used to find variances in projects based on the comparison of work performed and work planned. EVM is used on the cost and schedule control and can be very useful in project forecasting.

Earned Value Management System (EVMS) — the process, procedures, tools, and templates used by an organization to do earned value management. The point is that you can do earned value analysis calculations on any project, but unless you have complete earned value management in use on your project, it will be extremely unlikely to obtain correct results. In order to easily use EVM, your organization really needs to have an earned value management system in place.

Earned Value Definitions

~~How to make earned value work on your project~~

An important addition to Earned Value Project Management – Fourth Edition is the discussion of the two perceptions of the EVM concept. Both are valid, but one is better suited to the management of major projects while the other appropriate for use on all projects.

~~Earned Value Project Management (Fourth Edition)~~

This is the premier reference on the subject of Earned Value in Project Management. It is scholarly enough but not so academic as to interfere with a sufficient understanding of the subject in a practical, daily application. The examples are real world and can be adopted and/or adapted to any project.

~~Amazon.com: Customer reviews: Earned Value Project ...~~

Key benefits of Earned Value Management. Earned value management is easy to understand. It simplifies project management. Just by focusing on a handful of ratios project stakeholders can check the health of their projects. It is scalable. Earned value management can be applied at a project level, program level and even at a portfolio level.

~~Application of Earned Value Management in Project management~~
The Earned Value Management (EVM) and the Critical Path Method (CPM) are widely accepted methods and are often used simultaneously to evaluate project performance. The common practice is to use EVM to evaluate the status of project cost and forecast the project's cost at completion while using CPM to evaluate the status of project schedule and forecast the project's completion time.

~~The earned schedule—Project Management Institute~~
We then focus on the new EVM calculations as presented in A Guide to the Project Management Body of Knowledge (PMBOK® Guide)—Fourth Edition. Using two scenarios from a case study, we explore the new To-Complete-Performance-Index (TCPI)
