What Fan Engineering (Midlands) Limited offers above all else is a vast understanding of fan applications. We will select, design and manufacture the correct industrial fan for your installation, ensuring a long and trouble free fan life. Your company can only benefit by using Fan Engineering (Midlands) Limited for all of your fan requirements.

HP Blower fans are designed to handle low volumes against high pressures. They handle clean air, have medium peak efficiency, and an overloading power characteristic. We manufacture a range of standard diameters from 480 mm to 760 mm and with this range we can develop volumes up to 6000 M<sup>3</sup>/Hr (3500 CFM) and pressures up to 12500 Pa (50"swg)

# Read Book Fan Engineering H

THERMAL DESIGN The need for forced-air cooling should be determined at an early stage in system design. It is important that the design plans for good airflow to heat-generating components and also allows adequate space and power for the cooling fan. The first stage in designing a forced-air cooling system is to estimate the required airflow.
