instrument cluster. The following are warning lights and indicators found in vehicles built by Ford. Click a link to learn more about each one.

## **Ford Warning Lights and Symbols | DashboardSymbols.com**

Engine Light: One of the most sensitive lights on a Ford, the check engine light has two warning levels. For less serious issues (assuming the vehicle is operating normally), the light will stay on but remain steady. If the light blinks, however, there is a major issue. Do not drive the vehicle. Have it towed to the nearest repair facility.

the Ford Bronco, the Expedition was the first full-size Ford SUV sold with a four-door body. For its entire production life, the Ford Expedition has been derived from the corresponding generation of the Ford F-150 in production, sharing some body and mechanical components.

## **Ford Expedition - Wikipedia**

So I drove my explorer down from NY to GA, and on the way down the AC gave out. Since it's hot and the AC wasn't working, the Explorer has been sitting in the driveway for the past month. The other week I went to start it and it struggled to start. It made a squealing sound and then a pop, and I noticed smoke coming from the engine. I checked it out to see the serpentine belt shredded.

Your Ford Expedition 's brake light indicator is there to let you know that there is an issue with the brake system. It is different than the anti-lock brake system, which gets its own ABS warning light. The brake light indicates that there is a problem with the physical braking system itself. If you are reading this article trying to figure out whether you should drive your vehicle, check the emergency brake first.
