A practical look at extending the value of Building Information Modeling (BIM) into facility management—from the world's largest international association for professional facility managers. Building owners and facility managers are discovering that Building Information Modeling (BIM) models of buildings are deep reservoirs of information that can provide valuable spatial

and mechanical details on every aspect of a property. When used appropriately, this data can improve performance and save time, effort, and money in running and maintaining the building during its life cycle. It can also provide information for future modifications. For instance, a BIM could reveal everything from the manufacturer of a light fixture to its energy usage to maintenance instructions. BIM for Facility Managers explains how BIM can be linked to facility management (FM) systems to achieve very significant life-cycle advantages. It presents guidelines for using BIM in FM that have been developed by public and private owners such as the GSA. There is an extensive discussion of the legal and contractual issues involved in BIM/FM integration. It describes how COBie can be used to name, capture, and communicate FM-related data to downstream systems. There is also

implement, and work with a variety of technologies without any prior experience in information technology. *Technology for Facility Managers* presents the cutting-edge technology that facility managers will come across in their careers. Each chapter covers a different technology and includes an overview and basic primer about the technology—the current use of the technology, how it's evolving, and how it will impact the practice of facility management in the future—and is complemented with case studies that address how the technology was implemented and the effect it had on the organization. Technologies covered include: Building information modeling (BIM) Building automation systems (BAS) FM automation (CAFM/IWMS) Condition assessment/life cycle analysis Radio frequency identification (RFID) Geographic information systems (GIS) Social networking Sustainability and
