In a future where the Population Police enforce the law limiting a family to only two children, Luke, an illegal third child, has lived all his twelve years in isolation and fear on his family's farm in this start to the Shadow Children series from Margaret Peterson Haddix. Luke has never been to school. He's never had a birthday party, or gone to a friend's house for an overnight. In fact, Luke has never had a friend. Luke is one of the shadow children, a third child forbidden by the Population Police. He's lived his entire life in hiding, and now, with a new housing development replacing the woods next to his family's farm, he is no longer even allowed to go outside. Then, one day Luke sees a girl's face in the window of a house where he knows two other children already live. Finally, he's met a shadow child like himself. Jen is willing to risk everything to come out of the shadows—does Luke dare to become involved in her dangerous plan? Can he afford not to?

What if the perfect world wasn't built for you? Welcome to QualityLand, the best country on Earth. Here, a universal ranking system determines the social advantages and career opportunities of every member of society. An automated matchmaking service knows the best partners for everyone and helps with the break up when your ideal match (frequently) changes. And the foolproof algorithms of the biggest, most successful company in the world, TheShop, know what you want before you do and conveniently deliver to your doorstep before you even order it. In QualityCity, Peter Jobless is a machine scrapper who can't quite bring himself to destroy the imperfect machines sent his way, and has become the unwitting leader of a band of robotic misfits hidden in his home and workplace. One day, Peter receives a product from TheShop that he absolutely, positively knows he does not want, and which he decides, at great personal cost, to return. The only problem: doing so means proving the perfect algorithm of TheShop wrong, calling into question the very foundations of QualityLand itself. Qualityland, Marc-Uwe Kling's first book to be translated into English, is a brilliantly clever, illuminating satire in the tradition of Kurt Vonnegut, Douglas Adams, and George Orwell that offers a visionary, frightening, and all-too funny glimpse at a near future we may be hurtling toward faster than it's at all comfortable to admit. So why delay any longer? TheShop already knows you're going to love this book. You may as well head to the cash register, crack the covers, and see why that is for yourself.

"'Srulik, there's no time. I want you to remember what I'm going to tell you. You have to stay alive. You have to! Get someone to teach you how to act like a Christian, how to cross yourself and pray. . . . The most important thing, Srulik,' he said, talking fast, 'is to forget your name. Wipe it from your memory. . . . But even if you forget everything—even if you forget me and Mama—never forget that you're a Jew.'" And so, at only eight years old, Srulik Frydman says goodbye to his father for the last time and becomes Jurek Staniak, an orphan on the run in the Polish countryside at the height of the Holocaust. With the danger of capture by German soldiers ever-present, Jurek must fight against starvation, the punishing Polish winters, and widespread anti-Semitism as he desperately searches for refuge. Told with the unflinching honesty and unique perspective of such a young child, Run, Boy, Run is the extraordinary account of one boy's struggle to stay alive in the face of almost insurmountable odds—a story all the more incredible because it is true.

Tracing the Way is the product of a lifetime of experience. In researching and compiling this book Hans Kung has traveled to every corner of the globe in search of God in his many guises. Kung casts an analytical eye over the major world religions and offers a view of the present and what that means when measured against the past. Kung surveys, as succinctly as possible, the historical stages of each world religion and analyses their major paradigms and paradigm shifts. For the present can be understood only in the light of constellations from the past which have persisted side by side with each other. Tracing the Way attempts to understand the religions as objectively as possible and discusses the social, political and historical contexts of the many forms of belief that exist today.

In this book, author Allan A. De Fina invites teachers, students and parents into the portfolio process, which offers many opportunities to assess a student's performance and growth over time.
