Note. Visual Studio supports two modes of project management: Web Site Projects and Web Application Projects. Web Site Projects lack a project file, whereas Web Application Projects mimic the project architecture in Visual Studio .NET 2002/2003 - they include a project file and compile the project's source code into a single assembly, which is placed in the /bin folder.

Project Management Playbook Example

Hi Julie, I'll see what I can do to create a master with several sub-projects. Ultimately I need to be able to produce reports based upon date ranges, specific applications, change id numbers, programmer assigned names, end dates, open end-dates, etc. Presumably this is where the filtering you mention comes into play.
