Modern Times is a 1936 American silent comedy film written and directed by Charlie Chaplin in which his iconic Little Tramp character struggles to survive in the modern, industrialized world. The film is a comment on the desperate employment and financial conditions many people faced during the Great Depression — conditions created, in Chaplin's view, by the efficiencies of modern industrialization.

Modern Times (film) - Wikipedia

Modern Times is a 30bbbl production brewery and tasting room in the Point Loma neighborhood of San Diego. Modern Times is named after a beautifully crazy utopian community founded in 1850, and (almost) all of our beers are named after real utopian experiments or mythological utopias.

This is the definitive guide to sparkling wine today, complete with profiles of exemplary producers, bottle recommendations, colorful infographics, and illustrated guides. Sparkling Wine for Modern Times considers sparkling wine traditions and offerings from around the world. This approachable book explores our perpetual fascination with sparkling wine and places each regional expression within the wider wine zeitgeist--from the radical grower revolution reshaping the highly conservative area of Champagne to Prosecco's overnight transformation into a multi-million-dollar brand to the retro appeal of natural wine's cult-hit *pé tillant naturel* to the next generation of real wines from Lambrusco, and beyond. The book covers the essential information for each growing region and highlights up-and-coming areas such as Jura in France, as well as can't-miss trends including traditional-method Sicilian sparklers and Californian *pé t-nat*. For each region, renowned wine writer Zachary Sussman gives expert bottle recommendations to seek out--wines that truly capture the style and spirit of the place. Fun and informative illustrated timelines, color charts, and production-method breakdowns from illustrator Nick Hensley appear throughout for quick learning. For anyone who's ever wondered why bubbles are confined to birthdays and holidays, Sparkling Wine for Modern Times is your go-to guide to enjoying sparkling wine all year long.

Winner of the Orange Prize for Fiction In the spring of 1946, Evelyn Sert stands on the deck of a ship bound for Palestine. For the twenty-year-old from London, it is a time of adventure and change when all things seem possible. Swept up in the spirited, chaotic churning of her new, strange country, she joins a kibbutz, then moves on to the teeming metropolis of Tel Aviv, to find her own home and a group of friends as eccentric and disparate as the city itself. She falls in love with a man who is not what he seems when she becomes an unwitting spy for a nation fighting to be born. When I Lived in Modern Times is "an unsentimental coming-of-age story of both a country and a young immigrant . . . that provides an unforgettable glimpse of a time and place rarely observed" (Publishers Weekly, starred review).

From the reviews: This is a fine book on two counts. First ... there is the singularly excellent treatment of the solution of biquadratic equations. Second, it paints a strong picture of mathematics as a very long sequence of accomplishments, each building on the ones before, in a way that beginning mathematicians can understand and appreciate it. It paints the picture in a concise and economical style, the style that mathematicians find elegant. I would particularly recommend Algebra in Ancient and Modern Times to strong high school students, to high school algebra teachers, to people who want a history of mathematics with a lot of mathematics in the history, and to anyone who needs to know how to find an analytic solution to a nasty fourth degree polynomial. -- MAA Online Varadarajan spins a captivating tale, and the mathematics is first-rate. The book belongs on the shelf of any teacher of algebra ... The great treasure of this book is the discussion of the work of the great Hindu mathematicians Aryabhata (c.476-550), Brahmagupta (c.598-665), and Bhaskara (c.1114-1185). Teachers of mathematics history will be especially interested in Varadarajan's exposition of the remarkable cakravala, an algorithm for solving $X^2 - NY^2 = \pm 1$. The book contains many exercises that enhance and supplement the text and that also include historical information. Many of the exercises ask readers to apply the historical techniques. Some of the exercises are quite difficult and will challenge any student. --Mathematics Teacher This text offers a special account of Indian work in diophantine equations during the 6th through 12th centuries and Italian work on solutions of cubic and biquadratic equations from the 11th through 16th centuries. The volume traces the historical development of algebra and the theory of equations from ancient times to the beginning of modern algebra, outlining some modern themes such as the fundamental theorem of algebra, Clifford algebras, and quaternions. It is geared toward undergraduates who have no background in calculus. V. S. Varadarajan is a professor of mathematics at the University of California, Los Angeles.

The West suffers from intense work pressure, longer and less well paid hours. This text is a sociological analysis of the relationship between overwork and unemployment. The only possible response, the author claims, is a renewal of the working class struggle.

A classic study of fifteen crucial years in the formation of the modern world The Birth of the Modern has established itself as a new kind of historical work - an examination of the way the matrix of the modern world was formed. Paul Johnson, one of today's most popular historians, takes fifteen critical years and subjects them to a fascinatingly detailed analysis: their geopolitics and politics, their cultural and intellectual life, their technology and science. He investigates every area of life, in every corner of the world. And he makes of this huge variety of elements a coherent narrative, told through the lives and actual words of the age's people - outstanding and ordinary - so that the reader feels he was there.

Men, Machines, and Modern Times, though ultimately concerned with a positive alternative to an Orwellian 1984, offers an entertaining series of historical accounts taken from the nineteenth century to highlight a main theme: the nature of technological change, the fission brought about in society by such change, and

society's reaction to that change. Beginning with a remarkable illustration of resistance to innovation in the U.S. Navy following an officer's discovery of a more accurate way to fire a gun at sea, Elting Morison goes on to narrate the strange history of the new model steamship, the Wapanoag, in the 1860s. He then continues with the difficulties confronting the introduction of the pasteurization process for milk; he traces the development of the Bessemer process; and finally, he considers the computer. While the discussions are liberally sprinkled with amusing examples and anecdotes, all are related to the more profound and current problem of how to organize and manage system of ideas, energies, and machinery so that it will conform to the human dimension.

Now more than ever, other cultures are affecting our everyday lives--and our children need to learn about the other countries of the world and their history. Susan Wise Bauer has provided a captivating guide to the history of other lands. Written in an engaging, straightforward manner, *The Story of the World: History for the Classical Child; Volume 3: Early Modern Times* weaves world history into a story book format. Who was the Sun King? Why did the Luddites go around England smashing machines? And how did samurai become sumo wrestlers? *The Story of the World* covers the sweep of human history from ancient times until the present. Africa, China, Europe, the Americas--find out what happened all around the world in long-ago times. Designed as a read-aloud project for parents and children to share together, *The Story of the World* includes each continent and major people group. *Volume 3: Early Modern Times* is the third of a four volume series and covers the major historical events in the years 1600 to 1850, as well as including maps, illustrations, and tales from each culture. Each *Story of the World* volume provides a full year of history study when combined with the Activity Book, Audiobook, and Tests--each available separately to accompany each volume of *The Story of the World Text Book*. Volume 3 Grade Recommendation: Grades 3-8.

English in Modern Times describes the development of the English language from 1700 until 1945, and argues that it is in the course of this later modern English period that the characteristics of 'modern' English evolved. This is the first undergraduate text to cover the whole of this important period, which has been called the 'Cinderella' of English historical linguistics because of its lack of representation in scholarly literature. This book is sociohistorical in orientation, arguing that social changes in the Anglophone world need to be taken into account if we are to understand the linguistic changes that occurred during this period. Further chapters deal with changes in vocabulary, syntax and morphology and phonology and with the attempts of lexicographers, grammarians and elocutionists to arrest and control these changes by codifying the language. Unlike many earlier histories of English, '*English in Modern Times*' does not define 'English' as confined to Standard (English) English, but also considers the development of extraterritorial Englishes and non-standard varieties of British English in the Later Modern period.
