Nature's Building Blocks. Nature's Building Blocks is an alphabetical listing of all known elements with each one being discussed under the following headings: derivation of the name; its presence in the human body and in the diet; its possible role in medicine; the history of its discovery; its economic importance; its role in warfare; its environmental impact; its basic chemistry; and finally a section 'element of surprise' which reveals some unexpected aspect.

Nature's Building Blocks by John Emsley

Materials. The materials common to many types of natural building are clay and sand. When mixed with water and, usually, straw or another fiber, the mixture may form cob or adobe (clay blocks). Other materials commonly used in natural building are: earth (as rammed earth or earth bag), wood (cordwood or timber frame/post-and-beam), straw, rice-hulls, bamboo and stone.
