The stunning success of Reviving Ophelia, Mary Pipher's landmark book, showed a true and pressing need to address the emotional lives of girls. Now, finally, here is the book that answers our equally timely and critical need to understand our boys. In Raising Cain, Dan Kindlon, Ph.D., and Michael Thompson, Ph.D., two of the country's leading child psychologists, share what they have learned in more than thirty-five years of combined experience working with boys and their families. They reveal a nation of boys who are hurting—sad, afraid, angry, and silent. Statistics point to an alarming number of young boys at high risk for suicide, alcohol and drug abuse, violence and loneliness. Kindlon and Thompson set out to answer this basic, crucial question: What do boys need that they're not getting? They illuminate the forces that threaten our boys, teaching them to believe that "cool" equals macho strength and stoicism. Cutting through outdated theories of "mother blame," "boy biology," and "testosterone," Kindlon and Thompson shed light on the destructive emotional training our boys receive—the emotional miseducation of boys. Through moving case studies and cutting-edge research, Raising Cain paints a portrait of boys systematically steered away from their emotional lives by adults and the peer "culture of cruelty"—boys who receive little encouragement to develop qualities such as compassion, sensitivity, and warmth. The good news is that this doesn't have to happen. There is much we can do to prevent it. Kindlon and Thompson make a compelling case that emotional literacy is the most valuable gift we can offer our sons, urging parents to recognize the price boys pay when we hold them to an impossible standard of manhood. They identify the social and emotional challenges that boys encounter in school and show how parents can help boys cultivate emotional awareness and empathy—giving them the vital connections and support they need to navigate the social pressures of youth. Powerfully written and deeply felt, Raising Cain will forever change the way we see our sons and will transform the way we help them to become happy and fulfilled young men.

Offers advice and guidance to parents and educators on how to cope with boys at risk and introduces a program designed to give boys an essential emotional education.

Adolescence is indisputably a turbulent time for both boys and girls. But statistics show that there is an overwhelming number of troubled boys - at high risk for depression and suicide, drug and alcohol abuse, violence and loneliness. What do boys need that they're not getting? In this ground-breaking book, leading child psychologists Dan Kindlon and Michael Thompson cut through the glib rhetoric about 'boy biology' to show that there are sure

ways for parents to help their sons travel the difficult road to manhood. Their practical and positive solutions to the problems that have plagued parents for years include: - Talk to boys directly in their own language - Recognize and accept their high activity levels - Use discipline to guide and build character, not to punish - Encourage them to control their anger by talking about their emotions - Teach boys that there are many ways to be a man 'Clearly and accessibly written, and suggest practical strategies to help parents and teachers' Guardian

My eight-year-old son is the only boy in his class who doesn't have a Gameboy. I don't want him to be ostracized for not having one, but I worry that it's addictive. What do you think? Our two sons are eleven and fourteen, and they are fiercely competitive. The tension around our house is awful. How can we help them get along better? We've worked very hard to keep our ten-year-old son in touch with his feelings. Sometimes it seems as if we've put him at a disadvantage, surrounded by tougher boys who can be pretty cruel with teasing. How can we help him protect himself when other boys start to tease? With his bestselling book *Raising Cain*, Michael Thompson, Ph.D., at last broke the silence surrounding the emotional life of boys and spearheaded an important national debate. His warmth and humor quickly made him a popular and respected international speaker and consultant. Now he directs his authority, insight, and eloquence to answering your questions about raising a son. With candid questions and thoughtful, detailed responses, *Speaking of Boys* covers hot-button topics such as peer pressure, ADHD/ADD, and body image as well as traditional issues such as friendship, divorce, and college and career development. This perceptive, informative, and passionate book will leave you not only with useful, practical advice but also with the comforting knowledge that other parents share the same concerns you do when it comes to raising our boys into well-adjusted, responsible men.

Details the complex nature of children's friendships and discusses the difference between friendship and popularity, how boys and girls deal with intimacy and commitments, and related topics.

An insightful and powerful look at the magic of summer camp—and why it is so important for children to be away from home . . . if only for a little while. In an age when it's the rare child who walks to school on his own, the thought of sending your "little ones" off to sleep-away camp can be overwhelming—for you and for them. But parents' first instinct—to shelter their offspring above all else—is actually depriving kids of the major developmental milestones that occur through letting them go—and watching them come back transformed. In *Homesick and Happy*, renowned child psychologist Michael Thompson, PhD, shares a strong argument for, and a vital guide to, this brief loosening of ties. A great champion of summer camp, he explains how camp ushers your children into a thrilling world offering an environment that most of us at home cannot: an electronics-free zone, a multigenerational community, meaningful daily rituals like group meals and cabin clean-up, and a place where time simply slows down. In the buggy woods, icy swims, campfire sing-alongs, and daring adventures, children have emotionally significant and character-building experiences; they often grow in ways that surprise even themselves; they make lifelong memories and cherished friends. Thompson shows how children who are away from their parents can be both homesick and happy, scared and successful, anxious and exuberant. When kids go to camp—for a week, a month, or the whole summer—they can experience some of the greatest maturation of their lives, and return more independent, strong, and healthy.
