This SAP user guide will help you to work with SAP ERP more efficiently and effectively. You will learn about the various options and shortcuts available for navigating in SAP ERP. Walk through how to configure and optimize your user interface. Dive into SAP ERP productivity accelerators such as screen layouts, keyboard shortcuts, menus, and transaction codes. Learn how to leverage variants to personalize a version of a report. Find out what your options are for downloading and exporting reports for offline analysis and distribution. Explore tips for SAP ERP integration and obtain expert advice for finding and navigating between related documents and master data. Get tips for setting default values for frequently used transactions. Obtain an introduction to how to view and process jobs, schedule and monitor background jobs, and access and view your print spools. By using practical examples and screen-shots, the author brings readers quickly up to speed to get the most out of their SAP system. - Navigate in SAP ERP efficiently and effectively - Configure your user interface - Streamline frequently used transactions - Quick reference guides to menu bars, commands, and shortcuts

SAP HANA is the SAP product for in-memory computing. It streamlines transactions, analytics, planning, and data processing on a single in-memory database allowing businesses to operate in real-time. Over the course of the last few years, the authors have led many diverse SAP HANA projects with extraordinary success resulting in 10,000, or in some cases even 100,000, times improvement of system performance. In this book, the authors share their findings from SAP HANA projects to help ensure the success of your SAP HANA project. The SAP HANA project guide will also help you identify suitable scenarios for your company to get started with in-memory computing, while sketching out a long term plan to provide innovation to your entire business using SAP HANA. We'll cover the following key topics: - Delivering innovation with SAP HANA - Creating a business case for SAP HANA - Thinking in-memory - Managing SAP HANA projects

If you are a business analyst, BI developer, or an IT professional who wants to learn the A to Z of how to work with Web Intelligence reporting tools and different types of data, then this book is for you. The only thing you need is a basic understanding of what Business Intelligence is and data concepts.

If you are a developer with a good command and knowledge of creating dashboards, but are not yet an advanced user of SAP BusinessObjects Dashboards, then this is the perfect book for you. Prerequisites include a good working knowledge of Microsoft Excel as well as knowledge of basic dashboard practices.

SAP BusinessObjects Dashboards is a leading Business Intelligence and reporting tool that provides you with a real-time understanding of your business with agile visualizations. Starting with an introduction to Dashboards and its benefits, the book slowly moves on to explain the dashboard creation process. After this, you will learn how to add charts, single-value components, maps, selectors, and other third-party plugins to the existing dashboards. Furthermore, it shares many best practices and will also help you to connect your dashboard to real data by establishing a data connection to a data source. You can also explore more about mobile BI and learn how to create dashboards for mobile devices. By the end of the book, you will be able to prepare, plan, and design interactive dashboards based on your business requirements using this cutting-edge BI tool.
