Solutions Of Equations By Dale Seymour Publications

Equivalent equations are equations that have identical solutions. Thus, $3x + 3 = x$

Read Online Solutions Of Equations By Dale

$x + 13$, $3x = x + 10$, $2x = 10$, and $x = 5$. are equivalent equations, because 5 is the only solution of each of them. Notice in the equation $3x + 3 = x + 13$, the solution 5 is not evident by inspection but in the equation $x = 5$, the solution 5 is evident by inspection.

from §9.6 in , part of §10.7 in . We have solved the wave equation by using Fourier series. But it is often more convenient to use the so-called d'Alembert solution to the wave equation 1 . While this solution can be derived using Fourier series as well, it is really an awkward use of those concepts.
