God is “ a great king over all the earth ” because he subdued the Canaanite peoples under Israel (Ps. 47:2-3). God and Difference interlaces Christian theology with queer and feminist theory for both critical and constructive ends. Linn Marie Tonstad uses queer theory to show certain failures of Christian thinking about God, gender, and sexuality. She employs queer theory to dissect trinitarian discourse and the resonances found in contemporary Christian thought between sexual difference and difference within the trinity. Tonstad critiques a broad swath of prominent Christian theologians who either use queer theory in their work or affirm the validity of same-sex relationships, arguing that their work inadvertently promotes gendered hierarchy. This volume contributes to central debates in Christianity over divine and human personhood, gendered relationality, and the trinity, and provides original accounts of God, sexual difference, and Christian community that are both theologically rich and thoroughly queer.

A recent Forbes listed Ellison as the fifth richest man in the world, and the second richest active player (behind Gates) in the technology world. Oracle Corporation, of which he is founder and CEO, is the fastest-growing software database company in the world, and the darling of technology investors. If you withdraw cash from an ATM, make an airline reservation, hook up your TV to the Internet, then you're using Oracle. All of this makes Ellison the man investors, techies, and people-in-the-know want to know more about. The ultimate self-made man, Ellison began Oracle with a \$1,200 investment and doubled its sales in eleven of its first twelve years. But he's a ruthless businessman who has used misdirection and half-truths to create one of the great high-tech success stories. He is also a daredevil sportsman with a 78-foot yacht, a number of fast jets, and beautiful women on his arm. If Gates is the nerd-King of the Valley, Ellison is its Warren Beatty. Mike Wilson has interviewed more than a hundred of Ellison's friends and enemies as well as Ellison himself to create an entertaining and provocative portrait of this enigmatic and visionary businessman.

Larry Ellison started the high-flying tech company Oracle with \$1,200 in 1977 and turned it into a billion-dollar Silicon Valley giant. If Bill Gates is the tech world's nerd king, Ellison is its Warren Beatty: racing yachts, buying jets, and romancing beautiful women. His rise to fame and fortune is a tale of entrepreneurial brilliance, ruthless tactics, and a constant stream of half-truths and outright fabrications for which the man and his company are notorious. Investigative reporter Mike Wilson, with access to Ellison himself and more than 125 of his friends, enemies, and former Oracle employees, has created an eye-opening, utterly fascinating portrayal of a Silicon Valley success story ... filled with the stuff that dreams and cultural icons are made of.

This book provides an exploration of some of the essential aspects of Judaism, Christianity and Islam. Leading Jungian analysts, theologians and scholars bring to bear psychological, religious and historical perspectives in an attempt to uncover the nature and

psychology of the three monotheisms.

In a short simple parable, this book relates in an understandable way, what it takes to be a hearer only, as opposed to what it takes to be, and the rewards of becoming a listener.

What do Christianity and queerness have to do with each other? Can Christianity be queered? Queer Theology offers a readable introduction to a difficult debate. Summarizing the various apologetic arguments for the inclusion of queer people in Christianity, Tonstad moves beyond inclusion to argue for a queer theology that builds on the interconnection of theology with sex and money. Thoroughly grounded in queer theory as well as in Christian theology, Queer Theology grapples with the fundamental challenges of the body, sex, and death, as these are where queerness and Christianity find (and, maybe, lose) each other.

This book is spent for those who have a desire to learn, or at least to think about things in different ways, and who consider themselves seekers of truth. It is also for those who have a nagging feeling that there is more to their own nature and the nature of their God than what they have been taught. In addition, I believe it's possible to acquire an accurate understanding of the way things really are, the fundamental essence of things with all of our inaccurate perceptions of them stripped away and when a person receives that kind of understanding there is an obligation to share it with others. You will probably enjoy this book if you sometimes ask yourself questions like the following: - Did God create evil? - If our physical body and spirit are reunited following our death through resurrection, what is the purpose of a physical body in the next life? - Why does God allow so much evil to take place here on this earth? - What is the human species capable of becoming/evolving to following generations of natural selection and continuous improvement in our pool of knowledge? - How are the principles of free will or agency and obedience not contradictory or in conflict? - How can we tell the difference between truth and non-truth or error?

The book presents research and sharing on free will in Man and God. Do humans have free will? Does God have free will? What are the consequences? What is the true nature of Man? What is the true nature of God? The author shares thoughts on the relationship between God and man for those who are open-minded and want to learn about the human condition.
