The External Control of Organizations: A Resource ...

Resource dependence theory (RDT) is the study of how the external resources of organizations affect the behavior of the organization. The procurement of external resources is an important tenet of both the strategic and tactical management of any company. Nevertheless, a theory of the consequences of this importance was not formalized until the 1970s, with the publication of The External Control of Organizations: A Resource Dependence Perspective (Pfeffer and Salancik 1978).

Resource dependence theory - Wikipedia

As an admin, you might have company requirements to restrict or control automatically forwarded messages to external recipients (recipients outside of your organization). Email forwarding can be a useful, but can also pose a security risk due to the potential disclosure of information.

Control automatic external email forwarding in Microsoft 365

"It is the fact of the organization's dependence on the environment that makes the external constraint and control of organizational behavior both possible and almost inevitable". There are various conditions that facilitate external control including: \* control groups has resources the org wants and can't get elsewhere

Pfeffer & Salancik - External Control of Orgs

The organization has no control over how the external environment elements will shape up. The external environment embraces all general environmental factors and an organization's specific industry-related factors. The general environmental factors include those factors that are common in nature and generally affect all organizations.

Internal and External Environment Factors that Influences ...

Organizations which are independent of government involvement are known as non-governmental organizations or non-government organizations, with NGO as an acronym. [5] [6] NGOs are a subgroup of organizations founded by citizens, which include clubs and associations that provide services to their members and others.
