The hidden connections : A science for sustainable living. p. xix My extension of the systems approach to the social domain explicitly includes the material world. This is unusual, because traditionally social scientists have not been very interested in the world of matter. Our academic disciplines have been organized in such a way that the natural sciences deal with material structures while the social sciences deal with social structures, which are understood to be, essentially, rules of ...

The Hidden Connections: A
Science for Sustainable
Living by Fritjof Capra
(Random House: New York,
2002) This book is about
creating learning
communities, but that is not
it's topic. Its topic is
networking, or in Capra's
words "connections." It's a
comprehensive review of all
cosmic networks that make up
"life, mind, and society."
