The all-around capabilities of the RV-4 are impressive. Fast, agile and fun, pilots of the RV-4 find it's glove-like fit to feel like a natural extension of their bodies. The RV-4 has taken part in a variety of performance competitions over the years, from the National Championship Air Races to a variety of aerobatic competitions. In the photo on the right, Axel Alvarez pilots his fast RV-4 around the pylons at the air races in Reno.

RV-4 - Van's Aircraft Total Performance RV Kit Planes

The Van's RV-4 is an American light homebuilt aircraft supplied in kit form by Van's Aircraft of Aurora, Oregon. It seats two people in a tandem seating configuration with the pilot accommodated in the front seat. The Van's RV series has become the most popular kit-built aircraft in the world. As of April 2019, the RV-4 is the fourth most popular RV model. As of October 2019, 1436 RV-4s had been completed and flown worldwide.

6.34 versus 4.8 for the RV4/RV-6. The RV-9A also has 12% more wing area than the RV4/6 series. These features, along with a high lift air-foil designed by renowned wing designer, John Roncz, enable the RV-9A to climb and cruise almost as well on 160 BHP as do the RV4/6 using 180-200 BHP. The fuselage structure of the
